All clean produced and flowback fluids ready for injection into the deepwell are priced at \$0.50 per BBL. Modifications or price reductions could apply if volume guarantees are negotiated between the generator of the waste and Injection Disposal Services, LLC.

All dirty liquids that are not ready for injection into the deepwell and will require processing or solidification via centrifuge are priced at \$13.25 per BBL. Modifications or price reductions could apply if volume guarantees are negotiated between the generator of the waste and Injection Disposal Services, LLC.

All cuttings and solids will not be accepted at the facility if they are dry or solid enough to be delivered directly to a landfill.

Any other additional waste streams or services are priced at the rates listed above.
